

Flujómetros tipo Turbina

Turbine Flowmeter

NAME: Liquid Turbine Flowmeter

MODEL: MLWGY

- Converter can be 180° rotated
- Multiple power supply modes
- Upgrade high quality impeller, more stable and anti-clogging
- Various Display Units, kg, m³, ton, liter, gallon, etc.
- Excellent Repeatability 0.05% ~ 0.2%
- Suitable for application of blending/batching as well as storage and off-loading, etc.
- Excellent forging process with high wear resistance & high pressure application.

Turbine Flowmeter

NAME: Gas Turbine Flowmeter

MODEL: MLWGQ

- Tiny gas flow can be measured
- Small pressure loss with great anti-vibration and anti-pulsation flow performance.
- Upgrade high quality impeller, more stable and anti-clogging
- Various Display Units, kg, m³, ton, liter, gallon, etc.
- Temperature, pressure and flow of the measured gas can be detected, and can automatically track and fix the flow data.
- Using advanced micro-power high-tech, low power consumption.
- Excellent forging process with intelligent led display, can check temperature, pressure, flow, time, date and other data in real time.
